

HEALTH & SANITATION IN SCHOOLS: PARENTS, PLEASE DON'T COMPROMISE ON YOUR CHILD'S WELL-BEING.

When choosing a school, parents often focus on academics, results, and facilities—but one of the most critical aspects is often ignored: health, hygiene, and sanitation.

Please remember, your child spends nearly half of the day in school. The school environment directly impacts your child's health, immunity, and overall growth.

Cleanliness & Hygiene: A Non-Negotiable Requirement

A clean school environment is not a luxury—it is a necessity.

Unhygienic surroundings and poorly maintained toilets can lead to:

- Urinary tract infections (UTIs)
- Stomach and skin infections
- Frequent illness
- Weak immunity

These health issues may not always be visible immediately, but their long-term adverse effects appear in the coming years, affecting a child's physical strength, concentration, and academic performance.

Importance of Clean & Safe Toilets

Children hesitate to use dirty or unsafe toilets, which can cause serious health problems.

Regular cleaning, proper sanitation, and pest-free washrooms are essential to protect children from infections and long-term complications.

Unhygienic toilets silently damage a child's health.

Safe Drinking Water – A Basic Right

Access to clean and safe drinking water is fundamental for every child.

Contaminated or unsafe water can result in:

- Stomach infections
- Dehydration
- Reduced immunity

That is why a proper RO water filtration system is essential in schools to ensure safe drinking water for every child.

Health Today, Strong Future Tomorrow

If a child's immunity becomes weak:

- Learning is affected
- Attendance drops
- Confidence decreases
- Overall development suffers

As the saying goes:

"If health is lost, everything is lost."

Brilliant Public School – A Commitment to Hygiene

Brilliant Public School proudly stands as the only school in Korba truly committed to hygiene and sanitation.

We ensure:

- Clean, hygienic, and well-maintained toilets
- RO water filtration plant for safe drinking water
- Regular cleaning and sanitization
- Periodic pest control for child safety

For us, child health is as important as child education.

A Message to Parents

Please do not compromise when it comes to your child's health.
A healthy child can learn, grow, and succeed.
An unhealthy child struggles lifelong.

- Choose wisely. Choose the best.
- Because protecting your child's health today protects their future tomorrow.

Brilliant Public School – Where Health, Hygiene, and Education Go Hand in Hand.
